

Birds 1: **BRITISH BIRDS**

Did you take part in the RSPB's BIRDWATCH at the weekend? Many birds appear in coats of arms and the artists often try hard to get each bird exactly right. Today we will look at heraldic birds you might see in a British garden and tomorrow we will look at some exotic birds.

The top three are all **OYSTER-CATCHERS**, left we see a couple of **RAVENS** stuck on an arrow.

Right is a **WEAVER-BIRD**.

Left is a **MAGPIE**, the most intelligent of birds, able to recognize itself in a mirror!

Above right is a **MALLARD**, a type of duck.

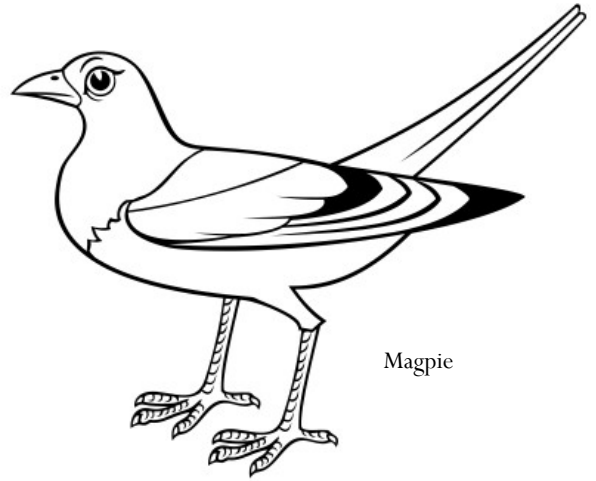

Above is a **PEEWIT**, properly a lapwing but often called a peewit after the sound of its call.

In today's colouring, try to copy the colours of the real bird, if you can.

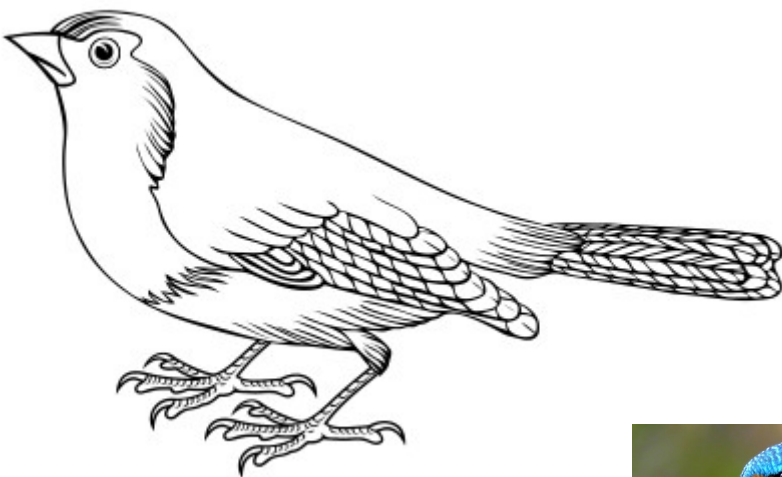

Peewit or Lapwing

Magpie

Robin

Kingfisher
