

Gruesome Beast 3: The **WYVERN**

This one is a real honey: it is a dragon with two legs and a tail usually ending in an arrow.

Just to add to its attractions, it is often shown **VOMITING FIRE!!**

The coat of arms of the Earl of Eglinton shows three wyverns, all busily vomiting fire Spooky!

This one is at least not vomiting but it does have a sword through it which is quite scary.....

It comes from the coat of arms of the Rev John McLulich.

Margaret of Denmark, who married King James III, had a wyvern on her arms. Here she is in a wedding selfie with her husband.

Have a go now at colouring in some wyverns—if you dare!
